

This is the Master Resume. It contains all of my experience, projects, skills, etc. in a copy-and-pastable format for use in resume templates and finished resumes.

To use: cherry-pick each project and description bullets, then combine/reword list items as needed to fit the role's description perfectly.

Skills Covered:

- React
- TypeScript
- JavaScript
- Frontend Frameworks
- Git
- Responsive design
- Mobile Development
- UI Design
- Figma
- Adobe Creative Suite
- Tailwind
- Communication / Collaboration
- REST API
- Data visualization
- Development life cycle
- CI/CD
- React Native
- Google Cloud
- OAuth
- Node.js
- Express
- Retail Experience
- Asynchronous programming
- JIRA

Skills Missing:

- HTML/CSS & Styling
 - HTML/CSS
- UI/UX Design
 - UI Design Best Practices
 - Accessibility
 - Interaction Design
 - Motion Design
- Frontend Frameworks & Libraries
 - Vue
 - Angular
 - Next.js

- Redux
 - Context API
 - Storybook
 - Motion.dev
- Testing Frameworks & Tools
 - Cypress
 - Jest
- Build Tools & Package Managers
 - Npm
 - Yarn
 - Webpack
 - Vite
- Content Management Systems (CMS)
 - WordPress
 - Contentful
 - Builder.io
 - Sitecore
 - Shopify
 - HubSpot
 - HubL
- Backend Development
 - Django
 - Ruby on Rails
 - Python
 - Java
 - Postgres
 - SQL
 - Multi-Tenant SaaS
- APIs & Data Formats
 - GraphQL
 - JSON
 - XML
 - Segment
- Optimization & SEO
 - Optimization
 - SEO
- Hosting & Cloud Services
 - Vercel
 - Netlify
 - AWS
- DevOps & Build Pipelines
 - Docker
 - Jenkins
 - Build Pipelines

- Bash / Command Line
 - Project Management & Methodologies
 - Remote Experience
 - Lead Projects
 - Agile
 - Problem Solving & Debugging
 - Open Source Contributions
 - Specialized Integration
 - Video Integration
 - OMSDK
 - Machine Learning
-

Professional Summary

Include this when the role is in a small business or the job description puts particular stress on the personality characteristics of the applicant.

Education

Optionally include relevant coursework

UNIVERSITY OF MARYLAND — Bachelor in Web and Digital Design
May 2023 - December 2024

-

UNIVERSITY OF EDINBURGH — Bachelor in International Business & Chinese
September 2019 - November 2022

- Best Presenter Award 2020 by Dean of Business School for excellent communication

Work Experience

KOOLISOO STUDIOS
Startup Co-Founder & Software Engineer

April 2023 - Present

- Planned and implemented a gamified e-sports prediction website, attracting 854 users in one week
- Used Figma to design responsive UX/UI for all 7 web pages
- Implemented RESTful API using Express.js, using MongoDB for NoSQL database storage
- Integrated React frontend with Express backend REST API.
- Worked with asynchronous programming in TypeScript using Axios and Fetch API
- Deployed new versions using Google Firebase, with GitlabCI for creating CI/CD pipelines
- Integrated Google Analytics and deployed a cloud-based production environment with Google Cloud
- Integrated authorization using Discord OAuth and Supabase.

ROVER STORE, INC

Software Engineer Contractor

March 2024 - November 2024

- Designed and developed task automation UI using React, TypeScript, and Material UI, saving 11 hours of labor per week
- Collaborated with stakeholders to identify requirements for task automation UI
- Integrated Apache ECharts library for inventory & sales data visualization
- Used JIRA for workflow management and Git for version control

MOGE TEE

Crew Member

August 2021 - March 2023

- Increased kitchen preparation efficiency, improving prep time by 50%
- Trained and mentored over 10 new employees
- Interacted with hundreds of customers daily, solving problems and fulfilling customer requests
- Fixed POS system errors and ensured all aspects of day-to-day operations ran smoothly
- Worked with a team of 10-20 members in groups of 2-4 to serve thousands of customers
- Worked in a fast-paced, high-pressure environment
- Multitasked, overseeing both front-of-house and kitchen operations simultaneously

Projects

DISCORD MUSIC BOT | JavaScript, MongoDB, Express.js, Discord.js

- Implemented RESTful API using Express.js, integrating with MongoDB database
- Created commands and managed bot interactions using Discord.js and discord-player npm library

LIVE MUSICIAN MARKETPLACE APP | TypeScript, React Native

- Used React Native for iOS and Android application development
- Created wireframes & functional prototype using Figma

HABIT BUILDING APP | TypeScript, React, Google Cloud

- Designed UI components using Figma
- Implemented responsive UI using React and TypeScript

POETRY FLOW APP | *TypeScript, Svelte, TailwindCSS*

- Designed UI using Figma
- Implemented responsive UI using Svelte, TypeScript, and TailwindCSS
- Wrote web scraping scripts in Python using Selenium and BeautifulSoup libraries

Skills

Languages: TypeScript, JavaScript, HTML, CSS, Python, Java, PHP, SQL

Frameworks: React, Node.js, Express, Svelte

Tools: Figma, Adobe Creative Suite, Git, JIRA, Google Cloud, npm

Other: Mandarin, Romanian

Wild Cards (bullet points to add to any project)

- Used Git for version control
- Used JIRA for workflow management
